<Date>

Hello <name>,

My interest with the <insert company name> began after meeting with <insert info here>. I share his passion for working in a mission-oriented company and admire his dedication. I too want to play a role in the dissemination of medical information to doctors around the world, and I'd like to start doing so as a Software Engineer with the <insert company name>.

As an avionics technician in the Marine Corps, I excelled in learning in a fast pace environment and thrived in a collaborative workplace. I have experience working in high-intensity workflows, delivering and performing quality work under tight deadlines. Now as a software engineer at 100Devs, I've worked on different full-stack applications, from design, coding, and testing to documentation and implementation. Most recently, I developed "Native StoryBooks," an application that serves all tribal communities and transforms their experience when writing stories. It is a fully responsive modern design, built using HTML, CSS, Javascript, Express as a framework for Node.js, and EJS as a templating language and MongoDB as a database.

My enthusiasm, perseverance, and initiative make me a perfectly capable candidate for the <name of position> position in the Digital Business Transformation Team. I'm excited about the opportunity to work on behalf of the patients and physicians of Los Angeles. I look forward to hearing back from you soon.

Thank you,

Isaac Hollow Horn Bear
